**python sessions**

Stepan Stepanovic <stepanovic.stepan@gmail.com>  
To:

Dear all,

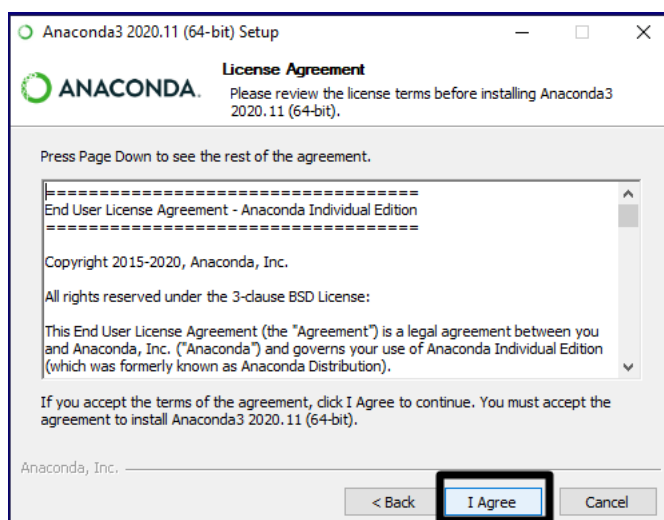

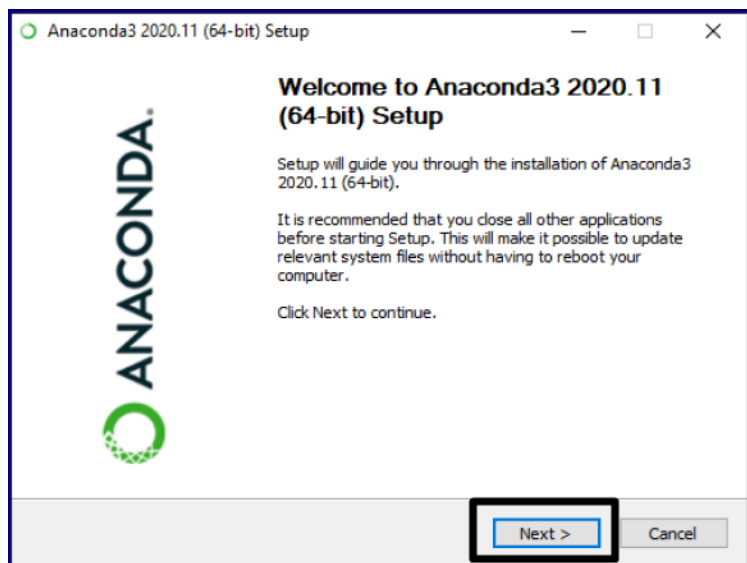

It would be useful if you could all install [Anaconda](#).

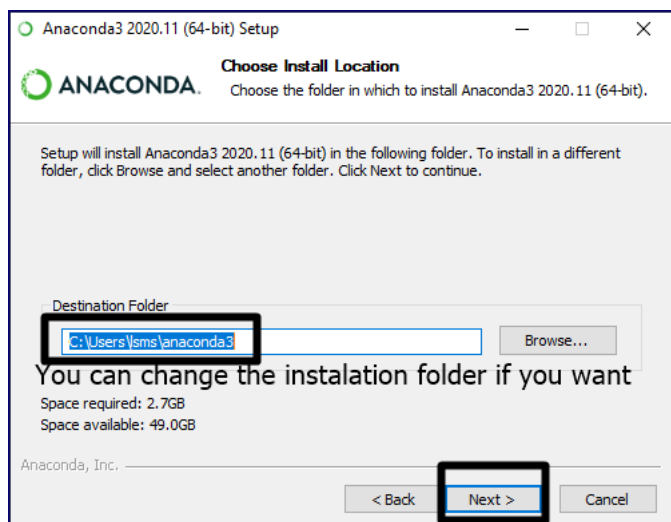

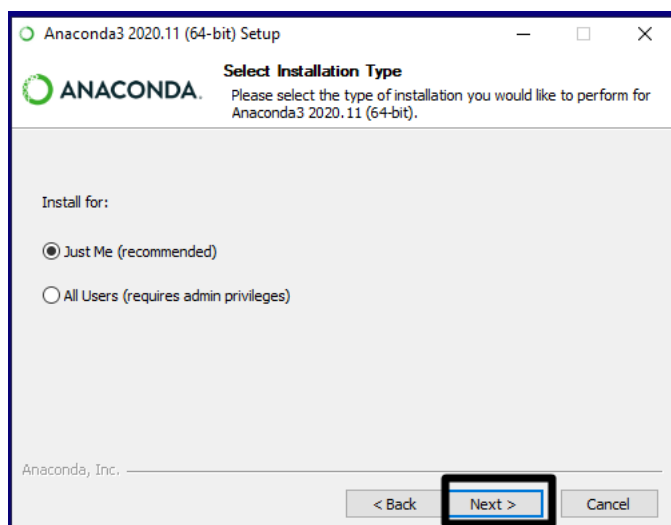

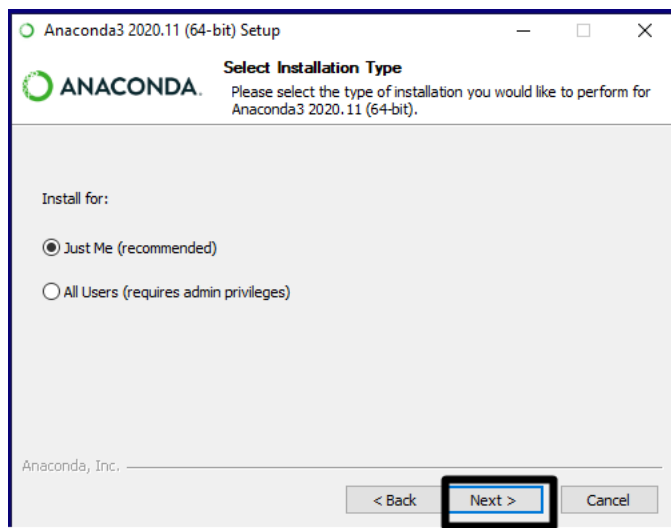

I will provide a short description here, and, if anybody has any problems we can clear it all out on the session.

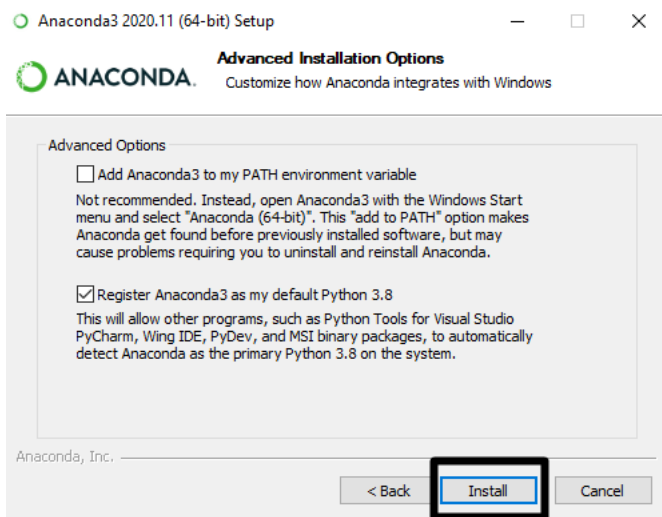

I will assume you are all using Windows on your work PCs, but, mac and linux are also fine.

1. Download the installation from this link ==>
2. Follow the simple installation procedure

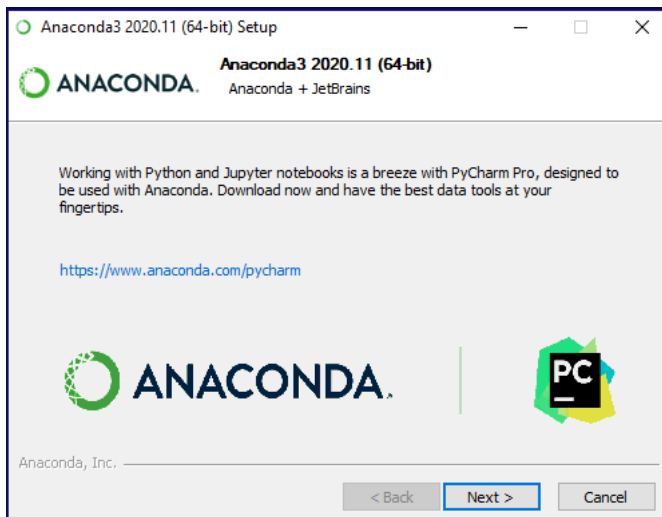

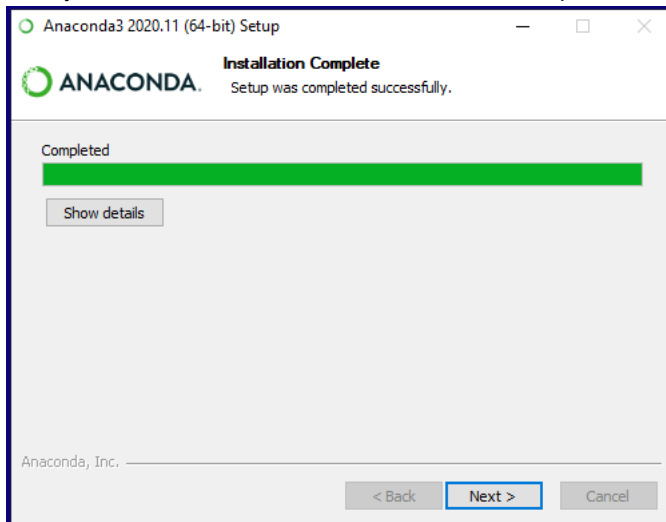

<https://repo.anaconda.com/archive/Anaconda3-2020.11-Winc>

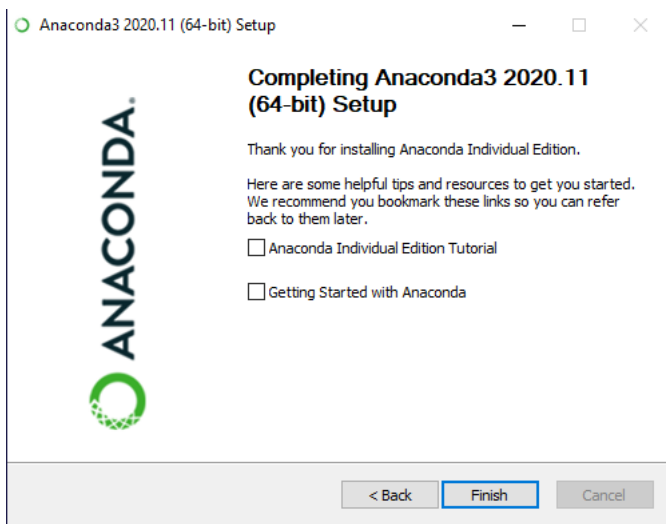

After you click install wait until the installation is completed and then click **Next** in the following windows:

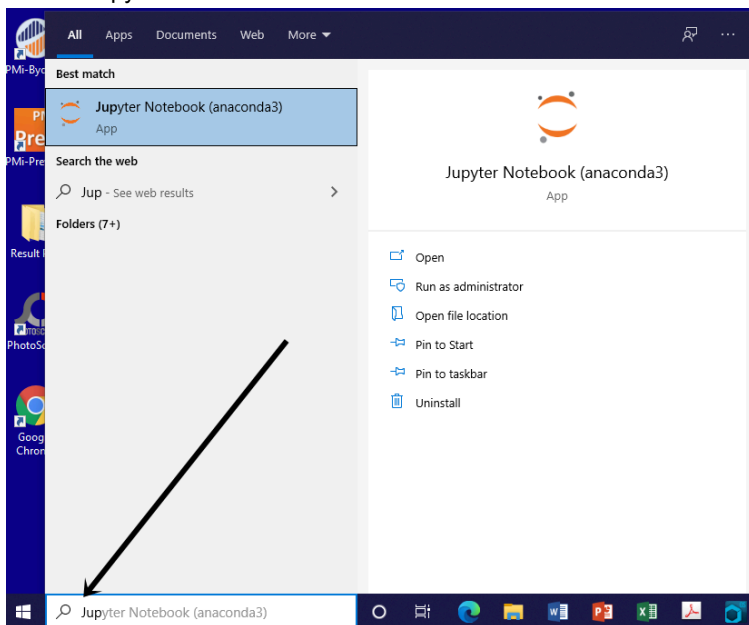

And, finally, click Finish in the last window

Start typing

Jupyter

to load Jupyter notebook

:: If you do not have a default browser, they will ask you to pick one now.

Now, we are ready to do some Python :)

Best regards,

Stepan
